

Put Your Herd on Sound Footing

BoviTrax™ flooring from Summit pays for itself in no time at all. Reduced cull rates, lameness and calving intervals with increased dry matter intake and heat detection.

BoviTrax is a non absorbent, high density, resilient rubber tiling system that is easy to install and maintain. It's soft on your cows' feet and your wallet but hard to wear out.

More advantageous. With Animat you pick from 36 different stocking parts and hope it all fits together. Every BoviTrax floor is custom fitted to your dairy with just the right parts precision cut from 4' x 6' sheets to cover exactly the area you want.

Bovi Trax

BoviTrax has precision water jet, positive interlock edges that fit tightly resulting in fewer anchors.

For Alleys, Pens & Parlors

Compare BoviTrax

- Full replacement warranty
