

# MIGHTY LITE® PORTABLE FLOOR MAT

## 12 lb. (6 kg) stall mat!

Hard to believe? Not really. Just as a 3 lb. Kevlar® vest can stop a bullet, Mighty Lite® mats are made of EVA - a space age polymer. EVA is a dense, closed cell foam such as you would find in the soles of an expensive pair of Nike® or Adidas® athletic footwear. And you know you typically wear out the tops of your sneakers before the bottoms.

These amazing mats have **interlocking edges** and are reversible for **extended** wear. They carry a full 5 year warranty but we know horses- some as heavy as 1,500 lbs. (700 kg) who have “enjoyed” the comfort and security of Mighty Lites since 1997. Those mats still have lots of useful life.

Mighty Lites are 1/4th the weight of bulky and heavy rubber mats. So light that you can take them from the stall, to your trailer, to the show grounds and back again without getting a sore back in the process. They are perfect for trailers when you are trying to save fuel costs. And they make the best grooming mat around.

Boarders love Mighty Lites. They can take them with them if they move to a new stable. They come in colors too - hunter green and terra cotta in addition to the standard black. Custom colors available. The non-slip surface combined with a deep resiliency provides your horse with superior safety and comfort. Mighty Lites help extend joint and tendon life. They are completely impermeable, unlike rubber, so urine cannot soak into the mat creating odor. Mighty Lites generally promote better animal health. And in cold climates their R-50 insulation value is 5-10 times higher than rubber. The perfect mat for llamas, alpacas, donkeys and miniatures!

Mighty Lites are thicker than most rubber mats and are now stocked in 9 piece wall-to-wall “kits” for standard 12' x 12' and 10' x 10' stalls. Priced the same as interlocking rubber mats, you will find owning them as easy as carrying them. Mighty Lites can usually be shipped right to your farm by UPS.

Colors: Black, Hunter Green and Terra Cotta (*kits black only*)

Size: 37" x 49" x 7/8" (94cm x 124.5cm x 22cm)

Weight: 12 lbs. (5.5 kg)

Kits are either 12' x 12' (3.66m) or 10' x 10' (3.05m)
